INDUSTRY EXPERIENCE

Our designs leverage more than 30 years of experience in manufacturing and product development. With manufacturing facilities based in Ghaziabad and Rudrapur, Singham e-rickshaws are an indigenous products, approved by the government of India. Our channel partners are spread across India, Nepal, Bangladesh among other countries.

Taking India to the World, we live in the process of continuously expanding our footprint domestically and globally.

We are a green establishment and one of the leading E-Rickshaw manufacturers in India. Our products are known for their quality, durability, and design aesthetics. Our in-house state of the art manufacturing facility, enables us to provide customised design solutions as per the customer requirements.

ABOUT US

U.P. Telcelinks Ltd. is an ISO 9001 and ISO 14001 company with its plants in Ghaziabad (U. P.) and Rudrapur (U. K.).

The company, incorporated in 1984, was set up by individuals with a vision to have a positive impact on the society. Over the years U. P. Telcelinks has become a leading name for quality manufacturing of electric vehicles, wires and cables, and wire harnesses.

With a modern outlook and through use of contemporary manufacturing technologies we ensure delivery of products that are fully compliant with domestic and international specifications.

DESIGN PHILOSOPHY

Singham electric vehicles are designed keeping in mind the Indian road conditions. By using only high quality materials, we are able to deliver a product that lasts many years. This, along with a comfortable ride for both the driver and passengers, makes Singham a superior product. We are known to undertake projects that require a high degree of customisations.

With aim to develop a stronger footprint across the country, Singham has warehouses located in Delhi and Ghaziabad. Further, the company is looking at adding warehouses in the western and southern region, due to the growing demand for Singham vehicles here.

FACILITIES

Our manufacturing facilities are located at:

**GHAZIABAD, UTTAR PRADESH
PANTNAGAR, UTTARAKHAND**

We have over 100,000 sq. ft. of covered area, which has been optimally utilised with ample scope for expansion.

Our in-house fabrication and paint shop facilities help maintain high quality and superior finish of our products.

Along with multiple assembly lines, we have state of the art testing facilities to ensure a delivery of a fault free product to our users.

Our manufacturing, testing and development teams consist of an appropriate mixture of skilled, semi-skilled and unskilled labourers and engineers with vast experience and training.

With an expansive focus on networking and provide ease of access to potential customers, we now have fully developed warehouses in Ghaziabad and Delhi. We are further planning to open two more warehouses in the NCR region in the coming months to serve a larger customer base.

THE BEST IN THE INDUSTRY

Increased Savings

Buying a Singham E-Rickshaw is a smart choice. With a running cost of 30p/km, Singham products offer potential savings of over 20%.

Ample Space

Given its smart design, Singham boast of the widest product in category. Our products are designed to optimize the space in the vehicle. This helps improve the luggage carrying capacity and the leg room as well.

Latest Technology

At Singham, we strive to use the latest technology to improve our products. Our Power Li-Ion range uses the latest Lithium-Ion technology. This ensures that the vehicle is light, and provides better mileage. Not to mention, the increased battery life.

Comfortable Ride

The products are designed in a manner to ensure that there is equitable weight distribution amongst the wheels. This improves vehicle balance. Also, our products are fitted with heavy duty suspensions, both front and rear. The suspensions ensure that the customer has a comfortable ride.

Government Subsidy*

Singham Power Li-Ion range is approved under the FAME - II scheme launched by the Government of India. This approval not only make the products eligible for government subsidies but also acts as a testament to its product quality.

Zero Emissions

Singham is 100% electric vehicle. As you may notice there is no tailpipe unit. This ensures that the product is eco-friendly and does not cause pollution when it runs.

LED Lights

Small things make a big difference. At Singham, we are committed to ensuring that energy is utilised in the best possible manner. That is the reason why our products are fitted with LED lights. These lights not only consumes less power but are also more attractive to look at as well.
